```
scrollView.addEventListener('scroll', event => {
```

```
// do something change view
```

```
if(hasScrolled(DOM) > 0.9 && !isRequesting) {
```

```
const DOM = event.target;
```

```
isRequesting = false;
```

```
let isRequesting = false;
```

```
.then(res => {
```

```
isRequesting = true;
```

```
fetch('url...')
```

若 isRequesting 為 false

再發送 Request

發送 Request 前，

設定 isRequest 為 true

```
isRequesting = true;
```
