operator

- 一個 function 傳入

observable 回傳

observable

- 可對元素作運算處理

observer

- 具有 next, error,

- 一個 object

complete

- 用來訂閱 observable

```
import { from } from 'rxjs';
```

```
import { map, filter } from 'rxjs/operators';
```

```
var sub = from([1, 2, 3])
```

.pipe(

```
complete: () => {},
```

```
next: x => console.log(x),
```

```
filter(x => x % 2 == 0)
```

```
error: err => {},
```

```
map(x => x + 1),
```

```
.subscribe({
```

```
import { from } from 'rxjs';
```

```
import { map, filter } from 'rxjs/operators';
```

```
var sub = from([1, 2, 3])
```

.pipe(

```
complete: () => {},
```

```
next: x => console.log(x),
```

```
filter(x => x % 2 == 0)
```

```
error: err => {},
```

```
map(x => x + 1),
```

```
.subscribe({
```
